OIL EXPERT GIVES ADVICE ON OILING

"Close observation of many cars shows that over 90 per cent of the owners, as a usual thing, run for thousands and sometimes thousands of miles without ever touching a grease can," says C. D. Messner, Maricopa county distributor for Pennoil products. "The job is too messy, they say, and we must agree; for the amount of oil fifth which they permit their cars to be encrusted with, is certainly messy to work in. The importance of proper lubrication and cleanliness cannot be exaggerated and surely there can be no good excuse for this neglect. Study the instructive charts in the instruction book which the manufacturers send out, and very probably you will find there a number of places, grease goes out cups and other lubricating points, which you have not been aware of."

"If you lubricate properly, the wear will be reduced to a minimum, then you are careful about keeping the mechanical parts of the car clean you will have eliminated two chief causes of trouble."

"Then give due consideration and time to the adjustments. If the parts adjusted are supposed to move in the course of their duty, see that they are free to move, but not loosely or wobbling. If the parts are supposed to be tight, see that the wrenches are properly applied to attain this desired effect. In regard to adjustments, the instruction books should be followed as closely as conditions and facilities permit."

"Give your car at least ten minutes of looking over, adjusting and lubricating every day. The hardest kind of continuous usage should not require over half an hour's work daily if the inspection work is systematized; that is, going over the different unit every day in addition to the things that require daily attention."

"Bubled down, the secret of car ownership and satisfaction depends chiefly on these three things: proper lubrication, mechanical cleanliness, careful adjustment; to which might be added also, common sense in driving."

"We are advising all dealers handling Pennoil products to give special attention to their customers' needs and to make sure that they are given the measure due for their automobiles. This and other points of service which the distributors of Pennoil have inaugurated has assisted in making Pennoil products extremely popular throughout the entire southwest."

DAINTY AND SWEET ARE CUTICURA GIRLS

BECAUSE OF CLEAR FRESH COMPLEXIONS

Live, glossy hair and soft, white hands, kept so by daily use of Cuticura Soap and touches of Cuticura Ointment now and then. Absolutely nothing better.

EASTERN CAPITAL STARTS NEW ACTIVITY AT OATMAN

(Special Correspondence.)
OATMAN, Ariz., Oct. 4.—With big eastern money coming into the camp and the resumption of work on a number of properties, the progress of development here was most notable in the past week.

The feature of the new developments was the encouraging progress of the Red Cloud, a Tom Reed holding. This property, which is completely surrounded by United Eastern ground, cut a rich stringer early in the week and is now cutting south on the 300 foot level. This stringer was about a foot wide and presented good values in gold.

It caused quite a stir of excitement in the camp. Rumors were spread that a rich strike was made. Passing the stringer they entered a new formation of country rock it being a new form of andesite.

This change of formation was quite noticeable on the dump. They are not yet in the ore but every indication appears that they are close to the vein and the encroaching of the vein is hourly expected.

The Lucky Boy is making all preparations for an extensive campaign of development on its property. Manager Watson has been notified by the strike in the Aztec, which is just north of the Lucky Boy property, it looks exceedingly bright for this company as two of the big veins on the Lucky Boy property are parallel to the Aztec vein.

Cross cutting for what is known as the Lexington vein is under way on the Pictured Rock. This company has been operating for some time past and has the shaft down to a depth of 270 feet. They are crosscutting at this level and at this writing have it cut in fifteen feet.

Nick D'Arcy, a prominent mining man of Los Angeles, who is largely interested in the Adams is in the camp and reports that the progress of the Adams is going along very favorable. They are now crosscutting to the vein.

Crosscutting is under way on the lower station has been completed on the 400-foot level and according to the calculations of the management the vein should be encountered with thirty feet of work. Eighteen men are at work on the property.

Several important deals were made here this week, one of the most important was the additional ground purchased by the Little Jim Gold Mining company. Quite a number of eastern mining men are in the field and several important deals are in the air of taking over some valuable claims.

Advises received here from eastern companies are to the effect that a large outlay of eastern money is headed this way for the financing and development of Oatman properties.

Three shifts are working on the Oatman Belle, the property operated by Lester M. Doll of Los Angeles and his Colorado associates. The shaft is being sunk with all speed and the matter secured from the bottom runs from four to seven dollars per ton in gold.

In close proximity to the Belle is the Big Lode property where renewed activity is now under way. This company has been financed by the manager, E. A. Boyce is about to put on three shifts to assure rapid work. E. R. Boyden, who financed the company, has just received here from eastern companies are to the effect that a large outlay of eastern money is headed this way for the financing and development of Oatman properties.

pany in the east arrived here today and is highly pleased with the conditions the Big Lode property.

On high authority it is learned that Chicago interests have financed the Oatman Gold Group property located three-quarters of a mile from the Oatman Belle and it is understood that an extensive campaign of development work will shortly be inaugurated on this property. James R. Goldsmith, a mining engineer, has just completed a highly favorable report, which when presented to the eastern people resulted in the deal for the financing of the company.

A great wave of activity prevails in the Black Range belt. All preparations have been completed for the starting of a full crew of three shifts on the new main three compartment shaft of the Black Range mine. It is understood that a former Cripple Creek man who broke all records for speed and efficiency on the tunnel work on the Los Angeles Aqueduct will be the superintendent in charge, on the operations of the Black Range. The plan of the work will be to follow the ore on the 300 foot level where values show gold from 17 to 20 dollars per ton.

They are driving the tunnel at the Oatman Crescent with all rapid speed. The tunnel is now in for a distance of 427 feet. A full equipment is installed on this property which is also located in the Black Range. Some of the biggest mining men in the east are heavily interested in the company and its treasury is in strong position to assure development work on a very extensive scale.

Another crew has been put to work on the Oatman Gold Monster. Dan Murphy, one of the most practical mining men in this part of the country is in charge of the property. The Oatman Gold Monster people who are also operating the Little Jim, located in the heart of the field, have notified Mr. Murphy to start the sinking of the shaft on the latter property.

Good values were obtained from the vein opened in the Nellie. The vein proved six feet in width and was cut in the shaft at a depth of 370 feet. It can not be figured at this time whether it was the main vein that was tapped or a spur vein.

After a temporary suspension work was begun on the Oatman Syndicate last week. The property is known as the J. Parke Channing property, he being heavily interested in its development.

The Wrigley tunnel is being driven at a record breaking speed. Eleven feet a day is being made with three shifts at work. The machinery is working in good shape and C. H. James, the mining expert, who is in charge of the operations is highly pleased with the development.

The stock boards here in the different brokerage offices are daily the means for the business men and miners. The great activity in Oatman stocks in the different exchanges are daily recorded here and the great public interest is highly pleasing with the Oatman population.

There is heavy buying of Oatman stocks in the camp. People here look forward to some startling development in fact it is freely predicted that the next 60 or 90 days will see a number of big strikes.

prevailing particularly the outlook of

GOOD RETURNS ON ORE FROM HUMMINGBIRD; R. R. PLANS GREAT

Returns have just been received from the American Smelting and Refining Company, on the sample shipments of ore from the Hummingbird property of the Roosevelt Lake Copper Company. Two sacks of one hundred pounds each were shipped about two weeks ago by General Manager Williams. Sample No. 1 consisted of high grade chalcopryite and on No. 1 claim and was a part of the ore pile of several tons of similar character taken out of the location hole.

In attempting to secure a fair average sample of this better grade of ore, Mr. Williams, who as an engineer, is inclined to err on the side of conservatism rather than exaggeration, picked a hand sample which assayed 18.3 per cent copper, and these figures have been used in the company's advertising. The figures from the Hayden smelter are there renewed confidence on the part of the stockholders, who now number nearly one hundred, over ninety per cent of whom are Arizonians. The hundred pound sample assayed 24.2 per cent copper.

Sample No. 2—also a hundred pound sack—from the milling operation taken from the old shaft, and piled up years ago when the owners of the property hoped for early railroad connections down the Tonto, showed a content of 2.6 per cent copper. The results of these ore tests have aroused great enthusiasm among the South Side stockholders and friends of the company, who were naturally the first to hear the good news. Over thirty thousand shares of the company's ten cent stock has already been sold, stock selling at a good rate, and progressing at a good rate, and the new impetus and it is predicted curiously now among local copper fans that there will be a scramble to get in on the present price, when the facts as to these ore tests gain circulation.

The recent discovery of a big outcropping of workable copper ore on claim No. 29 on the east side of the range, just above the mesas of Tonto Creek, the extremely encouraging results of these ore tests, and the bright prospects of the early construction of the Verde Valley Railroad, are altogether most encouraging to the company. Commenting on the present situation, Mr. Williams said: "The very moment that a pick strikes on the actual construction work of the Verde Valley Railroad, the Verde Valley that moment our stock will be withdrawn from the market at the present price. No one doubts that the road will be built, and built soon. If it is built, it means a great big piece of good fortune to our stockholders, as it will place our immense tonnage of copper within fifteen miles by a feasible route of most advantageous railway connections. We confidently believe that we have a property which will itself bear the burden of its own railroad, mill, and smelter too far that matter, but to have the railroad come right to our very door at this early stage of our development, is a piece of good luck of which we did not even dream when we took hold of the property. We went back into the wilderness purely as a matter of business preference—

with malice and aforethought—went back into the wilderness to get a real first choice—and we got it. But no spot in Arizona shows more copper and copper in abundance than this wilderness now. Today the auto stage swings along on the main highways loaded with armed passengers, who ride in security and comfort, where but a few years ago armed men rode in combat for security and picked their way through a hazardous and rocky trail. It is a wonderful transformation. Yet we meet people who seem to think that there will never be any more railroads in Arizona, and that all the big copper deposits of the state, some how occur where there are few, hard, and they are getting less and less."

NEW LEACHING PLANT SHORTLY TO BE BUILT

A plant for the handling of complex ores is the latest addition to the industries of Phoenix. This institution should be a great help to the many owners of mines in this vicinity.

There are in Maricopa county and the territory adjoining Phoenix, a large number of prospects and mines that have been awaiting a plant that could handle their ores conveniently. The owners of the new plant will use a chemical and electrical process. They state they are well supplied with funds and are ready to hear from parties with ore for sale.

The organizers expect to issue complete reports of their plans in the near future, and in the meantime are anxious to secure all the data possible regarding the tonnage of ore that will be available for handling, and the type of ore.

HUGHES' WOMEN COMING

[Republican A. P. Leased Wire]

CLEVELAND, O., Oct. 4.—The women's Hughes special train was given a warm reception here tonight. The speakers tonight assailed the foreign policy of President Wilson, attacked what they termed his "waterfall waiting" attitude toward Mexico and discussed the tariff situation, but refrained from urging votes for women.

The train left at midnight for Toledo.

Hire a Little Salesman at the Republican office. A Want Ad. will see more customers than you can.

PRINCETON TIGERS LOOK STRONG THIS FALL, THOUGH MANY STARS HAVE LEFT

Left to right: Coach "Speedy" Rush, Eddie Driggs, Quarterback Tibbott. These men are expected to put Princeton on the football map during the season of 1916.

GARFIELD, MILLER KIBBEY IMPRESSIVE TRIO ON STUMP FOR HUGHES HERE NEXT WEEK

Things are beginning to move in good order at the headquarters of the Hughes Alliance. Local Hughes voters are enrolling and marching proudly adorned with buttons.

The big bit of news that has been brewing for several days and is now ready for announcement, is that the itineraries of James A. Garfield, former Secretary of the Interior, and Congressman Miller of Minnesota, both of whom are giving their best efforts to the election of Mr. Hughes, will cross in Phoenix early next week, the definite date to be determined in a day or so. Watch for the announcement.

These gentlemen and probably Judge Kibbey, candidate for United States senator, will divide time in a monster meeting to be held at the Y. M. C. A. stadium. No need to tell anybody in Arizona about Jim Garfield, or Judge Kibbey, and Miller is as big as any of them, though Arizona is not his normal stamping ground. Everybody will want to hear these men, who are not merely candidates for office, but are the sort of men who do things and know why they do them.

Mr. Garfield, during his period in

President Roosevelt's cabinet, was the patron saint of this valley, as well as being one of the big men of the nation, and like Judge Kibbey has been in intimate touch from the beginning with the Salt River irrigation project, the one biggest thing in central Arizona. It is possible that Mr. Garfield will be in the valley for a couple of days.

Mr. Garfield is coming to Phoenix under the joint auspices of the Hughes Alliance and the State Central Committee.

E. E. Anderson, organizer for the National Hughes Alliance is sending in fine reports from the north. He has started a good working branch in Flagstaff, and reports a bubbling enthusiasm for Hughes all along the line of the Santa Fe. Mr. Anderson will be in Phoenix in a day or so, where the nucleus of an organization is already formed, and into which he expects to inject all the pep and ginger that the people of a high altitude can stand. And this is a good place to again remind the reader, of the importance of registering if he has not already done so. A special appeal is made to the women. Remember—voting is no longer a privilege, it is your duty.

Mr. Garfield, during his period in

ENROUTE TO THE BORDER

[Republican A. P. Leased Wire]
MOUNT GRETNA, Pa., Oct. 4.—The Thirtieth infantry, the last of Pennsylvania's militia units for federal service in Texas, left for El Paso tonight. Fifty-three officers and 216 men comprise the regiment, which is commanded by Colonel Ezra H. Ripple.

STORMY PETREL IN NEW YORK STRIKE

[Republican A. P. Leased Wire]

NEW YORK, Oct. 4.—"Mother" Jones, widely known as a labor orator, addressing a meeting here today of unionized carmen who went on strike September 6, urged those who heard her to "line up the women" with them. "You're fighting for them," she declared. "Let them help you fight."

She asserted that the carmen should insist on only seven hours work a day for \$5 pay.

According to officials of the transit companies, service on subways and elevated lines is normal and on surface lines nearly normal. Out of a total of 613 arrests during the strike, it was said tonight by Interborough Rapid Transit company officers, there have been 422 convictions while 42 cases are pending.

NEW YORK MILK SHORTAGE

[Republican A. P. Leased Wire]

NEW YORK, Oct. 4.—With the failure today of Mayor Mitchell to adjust the differences between producers and distributors of milk and the decision of Attorney General Woodbury to begin a state-wide inquiry into the causes leading to the rupture the situation, so far as the general public is concerned, was said tonight to be acute. A shortage of more than 50 per cent in the milk supply which already has resulted from the decision of Attorney General Woodbury to begin a state-wide inquiry into the causes leading to the rupture the situation, so far as the general public is concerned, was said tonight to be acute.
